

ELK STACK TRAINING SYLLABUS :

Unit 1: Introduction to ELK stack

- 1) Overview of ELK
- 2) ELK architecture

Unit 2: Logstash

- 1) Introduction
- 2) Logstash installation
- 3) Log file configuration
- 4) Plugins
- 5) Parsing with Logitech

Unit 3: Searching with Elasticsearch

- 1) Elasticsearch installation
- 2) Document retrieving and searching
- 3) Document indexing

Unit 4: Dealing with human language and searching in-depth

- 1) Structure search
 - 2) Complicated search
- Time analysis
- 2) Query filtration and aggregation
 - 3) Approximate aggregation
 - 4) Field data and doc values
 - 5) Word identification
 - 6) Synonyms
 - 7) Performance versus precision
 - 8) Token normalization

Unit 5: Data aggregation

- 1) Time analysis
- 2) Query filtration and aggregation
- 3) Approximate aggregation
- 4) Field data and doc values

Unit 6: Data modeling

- 1) Nested objects
- 2) RDBMS versus elastic search
- 3) Relationship handling
- 4) Scale designing

Unit 7: Geolocation

- 1) Geo shapes
- 2) Geo points
- 3) Geo aggregations
- 4) Geo hashes

Unit 8: Introduction to Kibana

- 1) Kibana installing
- 2) Time filter setting by field
- 3) Sample data loading
- 4) Data visualization and discovering
- 5) Document data and context
